Description of the Planned Network Change(s):

The Verizon Fox Mill VA 5E switch located at 2905 Fox Mill Rd., Reston, VA 20171 will be retired and removed from the Verizon network after all traffic served by this switch is migrated to the Fairfax VA CS2K switch located at 10431 Fairfax Blvd., Fairfax, VA 22030. All traffic to be migrated to the Fairfax VA CS2K switch includes, but is not limited to inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless and paging traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

All carriers, including competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless, and paging carriers, will need to provision new trunk groups to support direct end-office trunking to the Fairfax VA CS2K switch or have existing trunk groups to that switch augmented.

All ASRs for the Fairfax VA CS2K must be received no later than **March 2, 2020** in order to provide sufficient time to migrate the traffic described above. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Fox Mill VA 5E switch (**on or after May 1, 2020**). This will serve to guide interconnect re-routes of traffic for the NPA codes currently served by the Fox Mill VA 5E switch to reflect the Fairfax VA CS2K switch as the new home switch. All trunks to the Fairfax VA CS2K switch must be in place prior to the decommissioning of the Fox Mill VA 5E switch. All ASRs for the Fairfax VA CS2K switch must carry a project code of **RSTNVAFMRP0**.
